

1,100 videos on YouTube covering everything from basic arithmetic to chemistry, biology, calculus and economics.

8 million video views and growing.

70,000 students a month watching **35,000** videos a day. Over **2 million** minutes of instruction delivered world-wide in the **past week**.

Self-paced teaching software and assessment.

The most used, most **exhaustive**, and richest instruction on the Internet.

Mission of providing a world-class education to anyone, anywhere, for free.

*"The power of what Sal has created cannot be overstated. The same instruction that captivated our middle-class children who study in Switzerland and England is proving equally captivating to the teachers and students in rural villages in Uganda ... **There is no reason why they can't reach and engage every student on the planet as long as the Internet exists.**"*

These videos give students so much more than just a technical proficiency in maths and physics (although they do this quite well); they give students a love for mathematics and learning generally. That is priceless!"

-Daniel Stern, founder of UConnect.org

"...My eldest kid is dancing around in my room here because she is so excited that she finally found someone that teaches like this. You're awesome. Thank you."

"I don't know who you are but in my mind you are a savior. My children really struggle with math, there is an inherited learning disability in my family. They get it but only after seeing it done multiple times. Your videos will allow us to help our children get caught up with their peers. As a parent I have to say, Thank You Thank You Thank You."

"I've never been very successful with algebra, I know this is pretty basic, but I have almost no comprehension of mathematics. I was honestly going to be kicked out of school for being non-productive, I was ready to be thrown out, but now I get this. Thank you so much..."

"This is my first year in college and until today I was completely lost in math. Half an hour with your presentations taught me more than three months of sitting in my professors class. You seriously saved my grade."

"You're the only math tutor that makes sense to me. Most other ones seem to be speaking some sort of alien math language I cannot understand, assuming I already know formulas and all that. Thanks for keeping it simple and easy."

"You are my savior! I took the SATs during the beginning of the school year and pulled off a 750 in the math part. THANKS TO YOU!!..."

Prior to founding the Khan Academy, Salman Khan was the senior research analyst at a Bay Area investment fund. He has also held positions in product management at Xerox PARC and Oracle.

Sal received his MBA from Harvard Business School where he was president of the student body. He also hold a Masters in computer science, a B.S. in computer science, and a B.S. in mathematics from MIT where he was president of the Class of 1998.
